

ONLINE ZYGOMATIC & PTERYGOID IMPLANT PROGRAM

EXPAND YOUR TREATMENT OPTIONS FOR THE ADVANCED RESORBED MAXILLA.

Take your skills in the All-on-4® treatment concept to the next level—transform more patients' lives with zygomatic implants. Practice innovative surgical and prosthetic approaches to rehabilitate patients with severe maxillary atrophy. In severely resorbed cases, zygomatic implants have been an evidence-based surgical and prosthetic solution since 1999 and have eliminated the need for bone grafting altogether. This program is provided in collaboration with Quintessence Publishing.

Topics:

Head and neck anatomy, CT-scan interpretation, and treatment planning

Surgical protocols

Basic principles of zygomatic and pterygoid implants

Biomechanics of zygomatic and pterygoid implants

Risk assessment

Prosthetic protocols

Review of selected cases

Complications and solutions

Tuition
\$1,995

100 CE Credits

Program Provides

- ✓ Recorded live lectures and recorded live surgeries
- ✓ PowerPoint presentations
- ✓ Quiz module
- ✓ Resource center containing manuals, charts, medication protocols, and more
