See Your Patients Smile and Your Practice Grow with **the Care Pulse App!**

Grow your practice with **the Care Pulse app!**

Patients looking for a new dentist in your area will be able to easily find your office and see your amenities and services, read patient reviews, and then instantly book appointments. Care Pulse charges you a low, one-time fee for new patient bookings, but the expense is small compared to the long-lasting financial benefit of adding new patients.
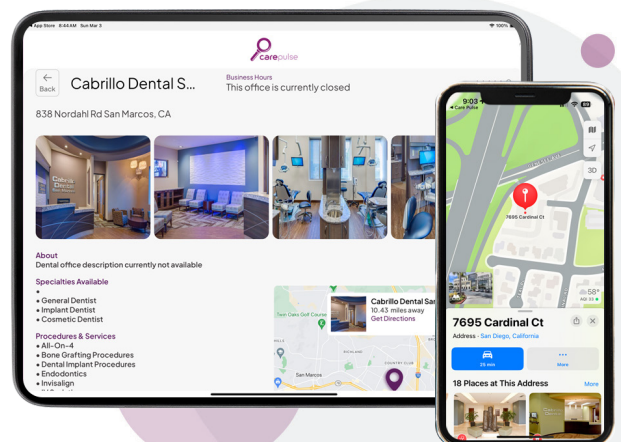

**Your patients will love using the Care Pulse app!**

Whether it's on their tablet, mobile phone, or desktop/laptop computer, patients can download the free app from the Apple or Android store and create a free account. It's an incredibly convenient, free, and easy way for them to book in-office or virtual visits and manage their appointments. And when your existing patients book appointments through the app, there is no additional fee for you!

The Care Pulse app also saves you time and money by increasing office efficiency!

When patients book, confirm, and manage their appointments through the app, your office staff is free to perform other, higher-level tasks in your practice.

Manage All of Your Office Information from **One Convenient Portal!**

All of the information that you enter in the Care Pulse portal, including locations and providers' daily schedules, is synced directly with the app, meaning that patients can automatically see all available slots for all of your locations and providers. And, when they use the Care Pulse app to book an appointment, the slot is automatically filled in your appointment book.

All practice information entered in the portal, including your amenities, technologies, services, and teledental visit fees (if any), are also automatically available to patients through the app. In addition, photos of your office uploaded into the Care Pulse portal are immediately visible to patients searching on the app.

Check out this **simple, low-cost, and convenient tool** for booking and managing appointments and connecting with new patients TODAY!
