CALIFORNIA IMPLANT INSTITUTE

ONLINE PTERYGOID IMPLANT PROGRAM

Program Overview

Take your skills in the All-on-4® treatment concept to the next level and expand your ability to treat patients with severe maxillary atrophy using pterygoid implants. This comprehensive program is designed for clinicians seeking advanced surgical and prosthetic protocols that enable predictable full-arch rehabilitation while avoiding extensive bone grafting procedures.

Gain a deeper understanding of patient selection, anatomical considerations, treatment planning, surgical execution, and restorative workflows associated with pterygoid implant therapy. Through evidence-based concepts and practical clinical applications, participants will learn how to manage complex maxillary cases with increased confidence, efficiency, and predictability.

By engaging the dense cortical bone of the pterygoid region, clinicians can often eliminate the need for sinus grafting and other extensive augmentation procedures, reducing treatment time, patient morbidity, surgical complexity, and overall treatment costs for patients.

The program also emphasizes complication prevention and management, prosthetic considerations, biomechanics, immediate loading concepts, and long-term maintenance protocols essential for successful full-arch rehabilitation in advanced atrophic cases.

Topics

- Pterygomaxillary Anatomy
- Biomechanics
- Treatment Planning
- Surgical Protocol
- Insertion and Angulation
- Implant Insertion Tools
- Postop Care
- Complications and solutions

Tuition: $995

50 CE Certificate

PACE ACADEMY of GENERAL DENTISTRY PROGRAM APPROVAL FOR CONTINUING EDUCATION

California Implant Institute is a Nationally Approved PACE Program Provider for FAGD/MAGD credit. Approval does not imply acceptance by any regulatory authority, or AGD endorsement. Nationally Approved from 8/1/2022 – 7/31/2028. Provider ID 108066

Academic Director

Dr. Louie Al-Faraje
