CALIFORNIA IMPLANT INSTITUTE

ONLINE

ALL-ON-X MASTER CLINICIAN

PROGRAM

Program Overview

Full-arch implant reconstruction (also known as All-on-4® or All-on-X) is a graftless, cost-effective solution that allows clinicians to provide patients with a fixed provisional prosthesis on the day of surgery, significantly reducing treatment time while improving quality of life, function, esthetics, and patient satisfaction.

This comprehensive program is designed to provide clinicians with a thorough understanding of contemporary full-arch surgical and prosthetic workflows, from patient evaluation and digital treatment planning to surgical execution, immediate loading protocols, prosthetic workflows, complication prevention and management, and long-term maintenance strategies.

Participants will gain practical insight into evidence-based protocols for achieving predictable outcomes in both straightforward and advanced cases, including the management of atrophic arches, tilted implants, prosthetic biomechanics, occlusion, soft tissue considerations, restorative efficiency, and interdisciplinary treatment planning.

This online program is provided in collaboration with Quintessence Publishing and features recorded live lectures, clinical demonstrations, and full surgical procedures presented by internationally recognized educators and experienced clinicians.

Topics

- Full-arch treatment planning
- Digital workflow
- Diagnostic data collection
- Surgical and prosthetic protocols
- Principles and guidelines of immediate loading
- Complications and solutions

Tuition: **$995**

50 CE Certificate

PACE ACADEMY of GENERAL DENTISTRY PROGRAM APPROVAL FOR CONTINUING EDUCATION

California Implant Institute is a Nationally Approved PACE Program Provider for FAGD/MAGD credit. Approval does not imply acceptance by any regulatory authority, or AGD endorsement. Nationally Approved from 8/1/2022 – 7/31/2028. Provider ID 108066
